blocfor[®] SELF-RETRACTING LIFELINE

The blocfor[®] AES self-retracting lifeline provides freedom of movement to workers performing their job at various heights. The device automatically takes up the slack in the rope, keeping it out of the way while minimizing the free fall distance, should a fall occur. In the event of a fall, the sudden jerk in the rope will activate the centrifugal locking mechanism, arresting the fall within 43 in. (1.1 m).
